Global Climate Risk Assessment Report

Generated: May 30, 2026 at 22:58 UTC · Data Sources: Open-Meteo, World Bank · Engine: Rule-Based Risk Scorer

Executive Summary — Global Risk Rankings

Critical Cities	High Risk	Medium Risk	Low Risk	Avg Score	Highest Risk
0	1	6	5	27.2/100	Cairo

Rank	City	Country	Overall	Level	Flood	Drought	Heatwave	Air Quality
1	Cairo	Egypt	51.2	HIGH	0.0	100.0	65.0	45.0
2	Karachi	Pakistan	40.9	MEDIUM	0.0	100.0	38.0	30.0
3	Lagos	Nigeria	37.6	MEDIUM	75.0	0.0	28.0	45.0
4	Dhaka	Bangladesh	35.4	MEDIUM	65.0	0.0	38.0	30.0
5	Mumbai	India	35.1	MEDIUM	10.0	65.0	38.0	30.0
6	Jakarta	Indonesia	34.4	MEDIUM	65.0	8.0	38.0	10.0
7	Beijing	China	27.9	MEDIUM	25.0	28.0	37.0	15.0
8	Nairobi	Kenya	16.9	LOW	38.0	13.0	0.0	15.0
9	London	UK	14.0	LOW	18.0	25.0	8.0	0.0
10	New York	USA	12.0	LOW	25.0	18.0	0.0	0.0
11	São Paulo	Brazil	10.9	LOW	35.0	0.0	0.0	3.0
12	Sydney	Australia	10.5	LOW	35.0	0.0	0.0	0.0

Detailed City Risk Profiles

Overall: 51.2	Flood: 0.0	Drought: 100.0	Heatwave: 65.0	Air Quality: 45.0	HIGH
---------------	------------	----------------	----------------	-------------------	------

Cairo, Egypt has an overall climate risk level of HIGH (51.2/100). The highest risk factors are drought (100/100) and heatwave (65/100). Immediate attention is recommended for early warning systems and community preparedness.

Overall: 40.9	Flood: 0.0	Drought: 100.0	Heatwave: 38.0	Air Quality: 30.0	MEDIUM
---------------	------------	----------------	----------------	-------------------	--------

Karachi, Pakistan has a MEDIUM overall climate risk score of 40.9/100. Primary concerns include drought (100/100) and heatwave (38/100). Continued monitoring is advised to detect emerging climate trends.

Overall: 37.6	Flood: 75.0	Drought: 0.0	Heatwave: 28.0	Air Quality: 45.0	MEDIUM
---------------	-------------	--------------	----------------	-------------------	--------

Lagos, Nigeria has a MEDIUM overall climate risk score of 37.6/100. Primary concerns include flood (75/100) and air quality (45/100). Continued monitoring is advised to detect emerging climate trends.

Overall: 35.4	Flood: 65.0	Drought: 0.0	Heatwave: 38.0	Air Quality: 30.0	MEDIUM
---------------	-------------	--------------	----------------	-------------------	--------

Dhaka, Bangladesh has a MEDIUM overall climate risk score of 35.4/100. Primary concerns include flood (65/100) and heatwave (38/100). Continued monitoring is advised to detect emerging climate trends.

Overall: 35.1	Flood: 10.0	Drought: 65.0	Heatwave: 38.0	Air Quality: 30.0	MEDIUM
---------------	-------------	---------------	----------------	-------------------	--------

Mumbai, India has a MEDIUM overall climate risk score of 35.1/100. Primary concerns include drought (65/100) and heatwave (38/100). Continued monitoring is advised to detect emerging climate trends.

Overall: 34.4	Flood: 65.0	Drought: 8.0	Heatwave: 38.0	Air Quality: 10.0	MEDIUM
---------------	-------------	--------------	----------------	-------------------	--------

Jakarta, Indonesia has a MEDIUM overall climate risk score of 34.4/100. Primary concerns include flood (65/100) and heatwave (38/100). Continued monitoring is advised to detect emerging climate trends.

Overall: 27.9	Flood: 25.0	Drought: 28.0	Heatwave: 37.0	Air Quality: 15.0	MEDIUM
---------------	-------------	---------------	----------------	-------------------	--------

Beijing, China has a MEDIUM overall climate risk score of 27.9/100. Primary concerns include heatwave (37/100) and drought (28/100). Continued monitoring is advised to detect emerging climate trends.

Overall: 16.9	Flood: 38.0	Drought: 13.0	Heatwave: 0.0	Air Quality: 15.0	LOW
---------------	-------------	---------------	---------------	-------------------	-----

Nairobi, Kenya has a LOW overall climate risk score of 16.9/100. Primary concerns include flood (38/100) and air quality (15/100). Continued monitoring is advised to detect emerging climate trends.

Overall: 14.0	Flood: 18.0	Drought: 25.0	Heatwave: 8.0	Air Quality: 0.0	LOW
---------------	-------------	---------------	---------------	------------------	-----

London, UK has a LOW overall climate risk score of 14.0/100. Primary concerns include drought (25/100) and flood (18/100). Continued monitoring is advised to detect emerging climate trends.

Overall: 12.0	Flood: 25.0	Drought: 18.0	Heatwave: 0.0	Air Quality: 0.0	LOW
---------------	-------------	---------------	---------------	------------------	-----

New York, USA has a LOW overall climate risk score of 12.0/100. Primary concerns include flood (25/100) and drought (18/100). Continued monitoring is advised to detect emerging climate trends.

Overall: 10.9	Flood: 35.0	Drought: 0.0	Heatwave: 0.0	Air Quality: 3.0	LOW
---------------	-------------	--------------	---------------	------------------	-----

São Paulo, Brazil has a LOW overall climate risk score of 10.9/100. Primary concerns include flood (35/100) and air quality (3/100). Continued monitoring is advised to detect emerging climate trends.

Overall: 10.5	Flood: 35.0	Drought: 0.0	Heatwave: 0.0	Air Quality: 0.0	LOW
---------------	-------------	--------------	---------------	------------------	-----

Sydney, Australia has a LOW overall climate risk score of 10.5/100. Primary concerns include flood (35/100) and drought (0/100). Continued monitoring is advised to detect emerging climate trends.
